Athens, GA 30605

To whom it may concern:

In my current position I have been responsible for maintaining the SQL Server database portion of our various applications. On a daily basis I manage 300+ SQL Server databases, and I am tasked with setting up maintenance plans, ensuring backups work, reviewing developer SQL code, and much more. I have extensive experiences working in Linux and Windows based environments, and in deploying code to be used in a large scale production environment. I am an independent worker with an ability to quickly pick up on new systems and technologies. In my previous position I was placed into a full stack development position and quickly worked to increase my knowledge in order to develop a knowledge database application to be used daily across the state of Georgia by the Georgia Department of Transportation. With my knowledge and skills I believe I would be a perfect fit for a Database Administrator position.

I will follow up with you in the coming days to ensure your receipt of my cover letter and resume, and the potential for me to join your organization. I can be reached at 678-736-1880, or via email at kevinpgoff98@gmail.com. Thank you for taking the time, and I am looking forward to hearing from you.

Regards,

Kevin Goff
